### Plow & Bridge Update

It's that time of the year again! Time to start getting ready for ice on the lake and all the activities that come with it.

Once we see enough ice, the club will put out our ATV bridges; which is around 7-8 inches thick. Due to the overwhelming use of overweight side by side UTVs, we will not put out our ATV bridges until we have more than enough ice to hold a UTV.

Bridges will be marked with one of three things; a Christmas tree standing up by it, a large orange cone or a large orange construction barrel. **Remember one at a time on the bridges. THAT INCLUDES ATV/UTV BRIDGES!** The ATV bridges are not for cars, trucks, jeeps, etc.

***Please drive slowly to and ACROSS the ATV/UTV and truck bridges. Don't be afraid to shovel them off if they're snow covered and chisel shove ice down etc.***

During early ice and throughout the ice season, please be considerate of others when parking your vehicles at the clubhouse; whether it's on land or by the landing. Looking forward to a great season!
